Summary

Full-Stack Developer with 2 years of experience building scalable web applications, enterprise platforms, and AI-enabled solutions. Experienced in Angular, React, Spring Boot, Node.js, and FastAPI with expertise in backend engineering, API development, distributed systems, cloud deployments, and performance optimization. Delivered scalable architectures, workflow automation, and AI-driven solutions across enterprise and freelance engagements.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL (PL/SQL), C/C++

Frontend: Angular, React, RxJS, NgRx, Redux, Context API, Tailwind CSS, Bootstrap, Angular Material, Material UI

Backend: Spring Boot, Node.js, Express, FastAPI, Django, REST APIs, GraphQL, MVC

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps & Engineering: Git, Docker, AWS, Azure, Linux, CI/CD, Microservices, System Design, Prompt Engineering

Experience

Tata Consultancy Services

Jan 2025 – Present

Full-Stack Developer

Current - 1 year 6 months

- Led delivery of 6 enterprise features across Angular and Spring Boot, reducing manual effort by 30%
- Optimized Redis caching and PostgreSQL query strategies to improve application responsiveness
- Developed scalable REST APIs and backend services supporting enterprise workflow automation
- Built Python-based AI automation pipelines for code analysis, improving maintainability scores by 20%
- Containerized applications with Docker and streamlined deployment workflows across environments
- Remediated 100+ vulnerabilities through structured refactoring, reducing SonarQube issues by 90%
- Mentored 2 developers on engineering best practices, code quality, and sprint delivery processes

Vandhana International Pvt. Ltd.

May 2024 – Aug 2024

Full-Stack Developer

3 months

- Created WCAG-compliant applications improving accessibility and mobile usability by 40%
- Delivered Django and MySQL services supporting workflow automation and centralized operations
- Designed configurable scoring engines evaluating systems across 10+ operational parameters
- Implemented reusable APIs and modular frontend components to improve maintainability
- Streamlined database interactions and backend workflows to enhance platform performance
- Developed HRMS modules supporting attendance and employee management for 35+ active users

Freelancing

Apex Marketing

Aug 2024 – Jan 2025

Full-Stack Developer

6 months

- Engineered scalable React and Node.js applications serving 5K+ monthly active users
- Implemented RESTful APIs with authentication (JWT/OAuth), rate limiting, and role-based access control (RBAC)
- Enhanced MongoDB schemas and query performance, reducing API response times by 40%
- Integrated LLM-powered AI services with prompt optimization and intelligent response caching
- Automated deployments using Docker, AWS, and CI/CD pipelines across multiple environments
- Established centralized logging, validation, and error-handling mechanisms for backend services
- Collaborated across 10+ client projects to deliver scalable full-stack solutions in Agile teams

REVV Environmental Solutions Pvt. Ltd

May 2023 – April 2024

Full-Stack Developer

1 year

- Architected a multi-tenant Angular and FastAPI platform supporting 100+ client workflows
- Defined scalable onboarding workflows reducing requirement gathering effort by 60%
- Automated operational pipelines, decreasing onboarding processing time by 90%
- Built reusable API-driven frontend modules improving development velocity and scalability
- Optimized PostgreSQL schemas and backend services to improve platform performance
- Established deployment-ready application architecture supporting future growth requirements

Projects

MoviesDB - Microservices Movie Collection Platform	Link GitHub
- Designed and developed a microservices-based movie collection platform enabling users to create, organize and share personalized movie collections - Integrated OMDb API for real-time movie discovery with intelligent search and metadata retrieval - Implemented service-oriented architecture separating frontend, business logic and authentication services - Built secure JWT-based authentication, collection sharing and REST APIs supporting scalable client-server communication	
Frontend Service <i>Angular, TypeScript, RxJS</i>	
- Developed responsive Angular SPA with reusable standalone components and lazy-loaded routes - Implemented collection management, movie search, authentication workflows and friend sharing interfaces - Optimized state management, API communication and UI responsiveness using RxJS	
Movie Service <i>Node.js, Express, PostgreSQL</i>	
- Built REST APIs for movie collections, CRUD operations and collection sharing - Integrated OMDb API for fetching live movie information with request validation and error handling - Designed scalable database schema supporting user collections and shared resources	
Authentication Service <i>Django, MongoDB</i>	
- Implemented authentication microservice with JWT-based login, registration and token validation - Developed secure user management APIs with password hashing and authorization middleware - Decoupled authentication from business services to enable independent deployment and scalability	

Education

Gati Shakti Vishwavidyalaya	2020 – 2024
<i>B.Tech - Electronics and Communication Engineering , CGPA: 8.02</i>	<i>4 years</i>
Relevant Coursework: Data Structures, Algorithms, AI Fundamentals	

Certifications

GitHub Copilot Certification	Microsoft	Jun 2026
Advanced React	Meta	Apr 2024
Version Control	Meta	Feb 2023
