Summary

Full-Stack Developer with 3 years of experience building scalable web applications using Angular, React, Node.js, and Spring Boot. Experienced in end-to-end development, system design, and performance optimization, with a strong focus on code quality and maintainability through AI-driven tooling. Proven track record of delivering high-impact features, reducing vulnerabilities, and improving system efficiency across front-end, back-end, and cloud environments.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C/C++, SQL (PL/SQL), MATLAB
Frontend: Angular, React, Bootstrap, Tailwind CSS, Material UI, Angular Material, RxJS, Redux, NgRx, Context API
Backend: Node.js, Spring Boot, Django, ASP.NET Core, Electron, REST, GraphQL, FastAPI, MVC
Databases: PostgreSQL, MySQL, MongoDB, Redis
Technologies: Git, Docker, AWS, Azure, Linux, Microservices, System Design, CI/CD, Distributed Systems, TDD, BDD
AI/ML: LangChain, RAG, NLP, Prompt Engineering, Agentic AI, Custom AI Agents, MCP

Experience

Tata Consultancy Services

Jan 2025 – Present

Full-Stack and Gen AI Developer

- Designed and built scalable system architecture for 6 features across APIs, UI, and services, reducing manual workflow effort by 30%
- Remediated 100+ vulnerabilities and reduced SonarQube-reported issues by 90% via structured refactoring
- Deployed AI-assisted code analysis pipelines, increasing maintainability scores by 20%
- Guided 2 junior developers over 10 sprint cycles, improving delivery consistency and code standards
- Designed CI/CD architecture integrating AI-based analysis pipelines, reducing defect leakage by 20%

Aventra Systems

Oct 2024 – Jan 2025

Full-Stack Developer

- Designed a responsive WCAG-compliant website improving mobile usability by 40%
- Created a scoring system evaluating systems across 10+ performance parameters
- Delivered an HRMS module used by 35+ users, reducing manual tracking by 50%
- Executed 8+ feature updates in agile sprint cycles

REVV Environmental Solutions Pvt. Ltd

May 2023 – Oct 2024

Full-Stack Developer

- Architected a scalable multi-tenant system handling 100+ client workflows with 35% improved performance
- Delivered onboarding flow reducing requirement gathering time by 60%
- Streamlined onboarding process cutting processing time by 90%
- Partnered with 5+ stakeholders delivering 10+ feature updates

Projects

Scalable URL Shortener | *System Design, Node.js, Redis, PostgreSQL*

- Designed a distributed URL shortening system handling high read/write throughput
- Implemented caching with Redis reducing database load by 70%
- Designed database schema and hashing strategy for collision-free short links
- Planned horizontal scaling using load balancers and stateless services

Movies DB | *Angular, Node, Express, TypeScript*

- Engineered a web app to manage 50+ movie collections with persistent storage
- Integrated movie search handling 100+ API requests per session
- Developed full CRUD operations with < 200ms response time
- Enhanced UI flow increasing user interaction by 30%

Education

Gati Shakti Vishwavidyalaya

2020 – 2024

B.Tech - Electronics and Communication Engineering (CGPA: 8.02)

Certifications

Front-End Development, Version Control, Linux
